

QCP3550PL

After many months of research, QH is pleased to announce the latest in technological advances has found its way into the range of Water Pumps currently on offer – the reinforced plastic water pump, or its more technical name: Phenolic Resin!

QCP3550PL fits a range of Fiat, Vauxhall and Suzuki. Currently in development is a pump with plastic body for various Peugeot models in line with the OE offer.

Developments will continue in line with OE specifications. The advantage of these pumps is that they are lighter in weight giving vehicle owners better fuel efficiency.

Ask your local QH Area Sales Manager for more information.

Gut gemacht.
